Jackson Ray

Technical Consultant — Automation, Data Analytics & Systems Architecture

Montreal, QC · Tel: 437-673-4543 · jacksonzhuang@cmail.carleton.ca · linkedin.com/in/jacksonray07 · github.com/jacksonzhuang07

PROFILE

Automation-focused technical consultant with experience designing and deploying Python, REST API, OCR/AI, SQL, and Power BI solutions across enterprise and federal government environments. Proven record of improving efficiency, modernizing workflows, and translating operational pain points into scalable technical systems.

KEY CONSULTING IMPACT

86% FASTER
Cut proposal processing (49 to 7 min), projected $90k+ annual savings.

500+ HRS / YR
Automated batch documentation and request workflows across teams.

200% FASTER QA
Increased federal QA testing with Selenium/Python, saving 10 hrs/wk.

1 DAY → 2 HRS
Reduced compliance reporting effort with automated Power BI pipelines.

PROFESSIONAL EXPERIENCE

Continuous Improvement Consultant, Automation · Omnitrans Sept 2025 – Present

- Built end-to-end pricing and quotation platform (Python, REST APIs, OCR, NLP, Supabase, Streamlit, Azure) cutting proposal time from 49 min to under 7.
- Engineered enterprise automation pipeline connecting API data histories, customer invoices, and documentation workflows end to end.
- Deployed OCR/AI batch processing system extracting document data into standardized templates, processing up to 10,000 jobs per batch.
- Developed Python/API bulk request-generation GUI enabling operators to submit 100 service requests at once (300% throughput boost).

Oracle Software Consultant (Contract) · Employment and Social Development Canada Aug 2024 – Jan 2025

- Developed Selenium-based Python regression and integration test suites for Oracle PeopleSoft, accelerating QA speed by 200%.
- Contributed to full-stack development of department-wide PeopleSoft HR platform using PeopleCode, JavaScript, and HTML.

Database Consultant · Environment and Climate Change Canada Dec 2022 – Sept 2023

- Designed relational database (Azure SQL, Access) for RIMS modernizing Schedule 1 substances data supporting 100% federal compliance.
- Built Power BI refresh workflows reducing reporting effort from 1 day to under 2 hours; built Python/Pandas ETL pipelines.

PROFESSIONAL SKILLS

Automation & Scripting: Python, Pandas, Selenium, PowerShell, Bash, VBA
APIs & Cloud: REST APIs, Third-Party Vendor APIs, Oracle PeopleSoft, LLM APIs, Microsoft Azure, Supabase, Vercel
AI/OCR & Data: Tesseract OCR, NLP Workflows, SQL, Azure SQL, PostgreSQL, Power BI, Excel
Web & Internal Tools: JavaScript, HTML, CSS, Streamlit, Tkinter, Git, Jira, Confluence, Agile

EDUCATION & CERTIFICATIONS

BSc in Computer Science, Honours (Co-op) · Carleton University 2020 – 2025

Dean's List (2020–2025) · Certifications: Certified Pendo Project Manager · AWS Certified Solutions Architect (in progress) · Languages: English, French, Mandarin
